

BEAUTIFUL BUTTERFLY

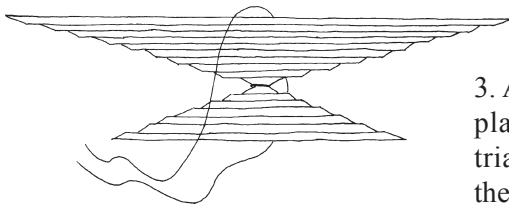

Fold fine pleats in two paper triangles and join them to make a beautiful crimped butterfly.

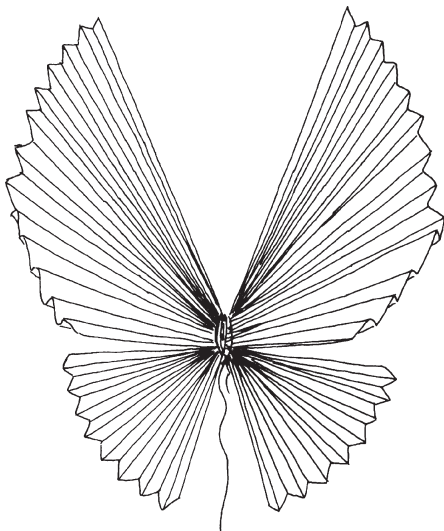

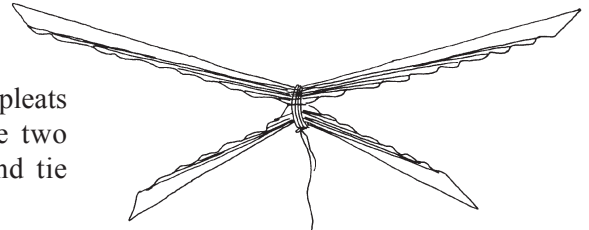

1. You will need two paper triangles - one 15-cm edge and the other with 10-cm edge length. You will also need some thread, card, scissors and glue.

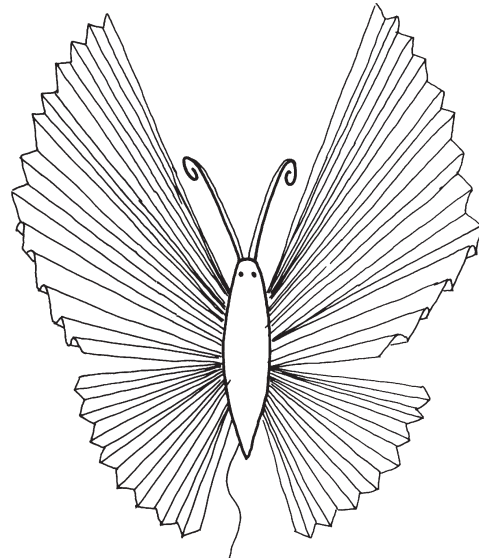

2. Fan fold both the triangles with very small pleats. The finer the pleats the more elegant will the butterfly look.

3. After finishing the pleats place the tips of the two triangles together and tie them with a thread.

4. The big triangle will open up to make the upper wing and the small triangle will make the lower wing of the butterfly. Gently open and shape the wings to make a graceful butterfly.

5. From a card sheet cut the body of the butterfly and stick it on to the wings. Add thin wires to make the antennae of the butterfly. Finally hang it by a fine thread.
