

## CLIMBING MAN

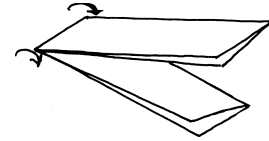

You need a long strip of paper to fold this delightful toy.  
This works best with paper which is a bit rough. Brown paper is ideal.

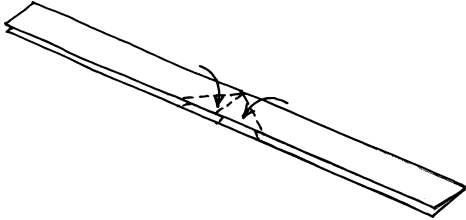

1. Cut a long strip of paper 30-cm x 8-cm.

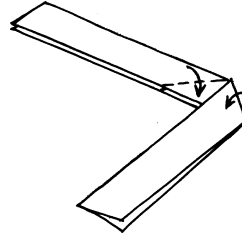

2. Fold it in half along the length.

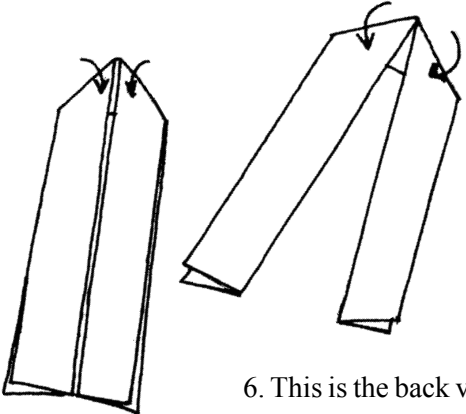

3. Fold it into a quarter as shown.

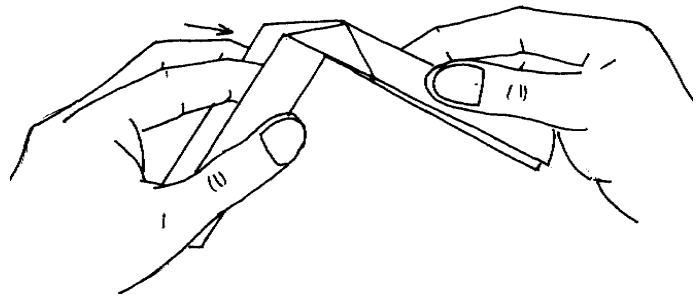

4. Open the strip and fold 45-degree corners at the centre.

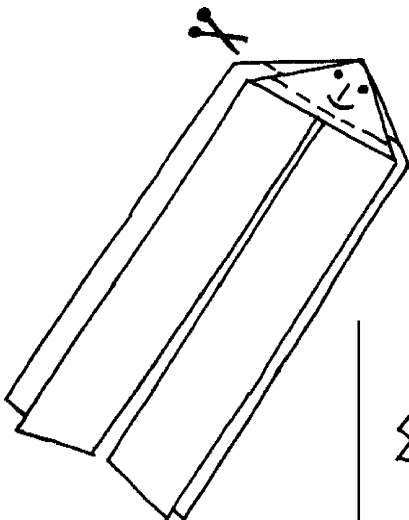

5. Here are the details of the 45-degree corners.

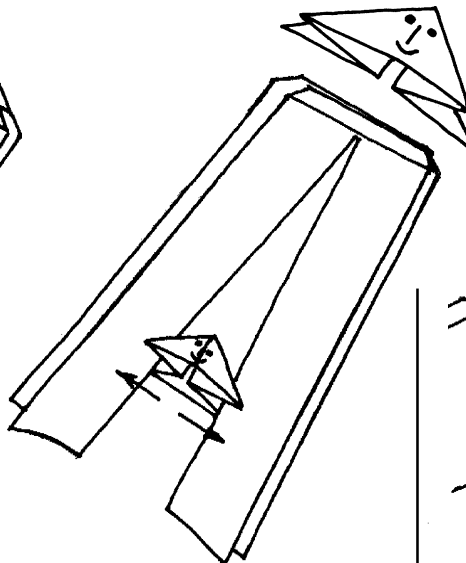

6. This is the back view.

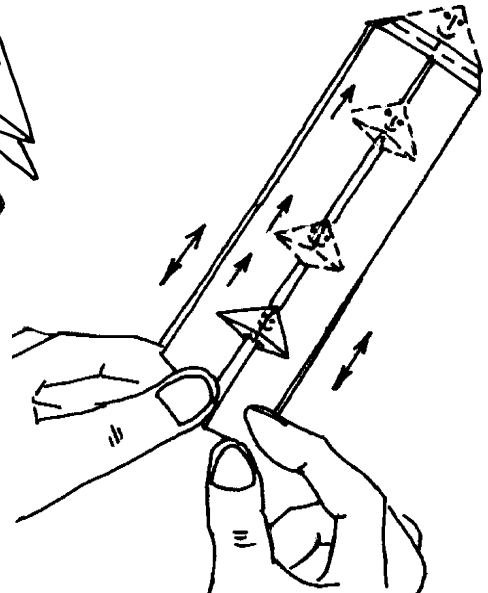

7. Now lift the left end at right angles. Squash it with your index finger in the middle. The lifting and squashing of the left end is shown here.

8. There would be two channels with a triangular head. Draw a face on the triangle and cut it on the dotted line.

9. Insert the triangular face between the channels.

10. On alternately pushing and pulling the two ends of the channel the triangular face will climb up and will be ejected from the top.
