

## FUNNY MONEY

Hold an aluminum hanger by the hook and midway along the longest side, stretch it into an elongated, diamond shape. Now bend the hook slightly so that it points back toward the opposite end of the diamond. File the end of the hook flat, so that a coin will balance on it. Dangle the hanger from your index finger and carefully balance a coin on the end of the as shown. The balancing is a bit tricky but this makes the demonstration all the more impressive. A little practice, a steady hand, and a lot of patience are all desirable at this point! Rock the hanger to-and-fro and then swing the hanger all the way around. If you are careful then the coin will remain “balanced” on the end of the hook even when you slow and stop the hanger. You can also rotate the hanger with the coin “balanced” around your head. Where is the coin? Is it still on the hanger?
