

### ICE-CREAM STICK BOMB

You just require five used ice-cream sticks for making this gentle bomb.

1. Hold three ice-cream sticks A, B and C together at one end with B at the bottom. Spread A and C as shown in the diagram.

2. Insert a fourth stick D, over A, under B and over C as shown.

3. Insert the last stick, E under A, over B, and under C as shown. The assembly of 5 ice-cream sticks will hold itself together. Try throwing it up in the air or against a wall. When it lands, it will "explode" and the sticks will fly in all directions.
