

MISCHIEVOUS BALL

You need

An old, used tennis or rubber ball and a marble.

How to make it

Cut the ball into two halves. Press the top to make a dent. Place the marble in the dent and wait. After some time the marble shoots up into the air and the dent disappears.

There is another way to play with this toy. Place the old ball with the dented side touching the floor. Wait. The ball will jump up on its own.

Find out

Why does the ball jump up?

Will a similar toy made out of a new ball work?
