Foreword

Development of a sound information system is critical for successful monitoring and implementation of any programme, particularly in social sectors. Design of a school information system has, therefore, been accorded priority from the very beginning of the District Primary Education Programme, as a result of which the District Information System for Education (DISE) was developed by the National University of Educational Planning and Administration (NUEPA), New Delhi. When *Sarva Shiksha Abhiyan* (SSA) was launched in 2001, not only was the coverage extended to all States & Districts of the country, its scope was also expanded to the entire elementary level of education. I am confident that DISE will play an important role in monitoring the *Right of Children to Free and Compulsory Education Act, 2009* in years that follow.

I am happy to note that DISE has become a regular source of information on all aspects of elementary education and, through it, information is available at all disaggregated levels such as school, cluster, block, district, state and national level. NUEPA used to bring out a set of eight annual publications including '*District and State Report Cards*', '*Elementary Education in Rural and Urban India*', '*DISE Flash Statistics including Educational Development Index*', and '*Elementary Education in India: Progress towards UEE, Analytical Reports & Tables*', which data-users and researchers found very useful. I am sure that anyone interested in the Indian education system will find the present publication a valuable resource.

The year 2010 is special for DISE because its project, www.schoolreportcards.in has received two National Awards: E-Governance 2010 (Department of Administrative Reforms and Public Grievances, Ministry of Personnel, Public Grievances and Pensions, GoI) and eINDIA 2010 (Department of Information Technology, Ministry of Communication & IT, GoI) and also Manthan Award South Asia 2010. I congratulate all those involved in the process of strengthening EMIS in the country.

I thank NUEPA, especially Dr. Arun C. Mehta, Professor and Head, Department of EMIS and entire DISE team, for bringing out the present publication. I also thank UNICEF, Delhi, for consistently supporting EMIS activities since 1995.

From the Vice-Chancellor's Desk

I am happy to observe that the process of strengthening EMIS initiated in 1995 has covered all the districts and states of the country and MIS Units have been established at both these levels and similar units are being established at the block level. The time-lag in availability of educational statistics has come down to less than a year at the national level and only few months at state and district levels. I am confident that DISE would play an important role in monitoring the implementation of *Right to Education Act*. In fact, the data capture format and information collection processes have already been suitably modified.

Besides launching one million plus School Report Cards, a set of eight publications exclusively based on the DISE data are being brought out by the National University each year. It is a great pleasure for me to present (a) DISE Flash Statistics: Elementary Education in India, Progress towards UEE, (b) Elementary Education in India: Where Do We Stand; District & State Report Cards; (c) Analytical Report & Analytical Tables, and (d) Elementary Education in Rural & Urban India which together encompass different aspects of universalisation of elementary education for the past more than eight years.

I take this opportunity to congratulate everyone involved in strengthening of MIS at various levels and for winning three prestigious National Awards (e-Governance, eINDIA and Manthan South Asia) in 2010. I thank the DISE team led by Prof. Arun C. Mehta for bringing out this publication. I hope that researchers, policy makers, administrators and planners will find the publication both informative and useful.

New Delhi
January, 2011

(R Govinda)

Acknowledgements

For the last several years, NUEPA has been actively involved in strengthening Educational Management Information System (EMIS) in the country. The *Flash Statistics: Elementary Education in India: Progress towards UEE* is based on the data received from all the States & UTs of the country for the year 2009-10. Besides an Educational Development Index, the publication presents not only state-specific indicators but also brings in many new dimensions of elementary education into focus. It incorporates key indicators on all aspects of universalisation of elementary education in case of all the States & UTs of the country.

The *Flash Statistics: 2009-10* is based on the data received from as many as 1.3 million schools spread over 635 districts across 35 States & UTs. The study of this magnitude cannot be completed without the active involvement and participation of the EMIS professionals at the national and sub-national levels. I am extremely thankful to all the State Project Directors, the state level EMIS coordinators and district level programmers and data entry operators for timely supply of data.

I take this opportunity to thank UNICEF, Delhi, in particular Ms Urmila Sarkar, Chief (Education) for consistently supporting EMIS activities ever since the inception of DISE and Ms Anita Kaul, Joint Secretary and Mr P. K. Tiwari, Director, Department of School Education & Literacy, Government of India, who played a crucial role in facilitating the implementation of DISE in various states. I am thankful to Dr. Deepa Sankar, World Bank, Delhi office for useful suggestions which has helped us in improving EDI each year.

I am thankful to Prof R Govinda, Vice-Chancellor, NUEPA, for his consistent encouragement and guidance. I take this opportunity and thank NUEPA faculty for their support.

The contribution of Shri Naveen Bhatia, Computer Programmer, NUEPA and Shri Shalender Sharma, Chief Consultant, Technical Support Group, Ed. CIL, in database management, is gratefully acknowledged. I am thankful to Ms Aseela M, Project Assistant (DISE Project) for computing Educational Development Index and Ms Shakun Sethi, Project Consultant (DISE Project) for computing indicators that have been presented in the document.

I am also thankful to colleagues in the Publication Unit especially Shri Pramod Rawat, Deputy Publication Officer and Ms Sheeja Biju, Project Publication Officer (DISE Project) for timely bringing out the publication.

I hope that this publication will be of value to education planners, policy formulators and researchers. Suggestions for improvement are most welcome.

Arun C. Mehta

Disclaimer

Raw data presented in the document or used for calculating indicators are essentially based on data provided by the States and UTs through annual data collection (as on 30th September 2009) under SSA (DISE). NUEPA is committed to provide professional and software support to all States and UTs as well as for dissemination and analysis of data as it is provided by the individual States and UTs.

In no way, NUEPA is involved in data collection as such and therefore the accuracy and truthfulness of the data rest with the States/UTs. The State Project Directors have certified that data is free from errors and inconsistencies and hence may be merged into the national database maintained at NUEPA, New Delhi.

** Figures may not add to total because of missing values.

a Incomplete coverage.

+ May not present true enrolment as a number of states did not report Grade VIII enrolment.

@ Including enrolment in Grade VIII under Secondary level.

Excluding AIE Centres.

c Including SSK & MSK.

b State has undertaken study to findout reasons of decline in primary enrolment.

** Based upon one year enrolment data. States showing above 100 percent rate have not been reported.

Average repetition and drop-out rates have been computed based on data of common schools (94.42%). States showing negative drop out rates have not been reported.

@ States reported above 100 percent transition rate have not been reported.

** Retention rate at primary level is calculated as per school cycle. At national level, it is calculated for Grade I to V based on the data of 604 districts.

** Computed based on the projected population provided by the Office of the Registrar General of India. States are advised to use more recent figures of child population obtained through HH Survey to workout the ratio.

*** : Grade V enrolment minus repeaters in Grade V in 2009-10 as a percentage of 11 year old child population (based on Registrar General of India estimates).

⁺⁺ Computed based on the projected population provided by the Office of the Registrar General of India. States are advised to use more recent figures of child population obtained through HH Survey to workout the ratio.

* Based on the incomplete coverage as a number of states have not reported Grade VIII enrolment.

**EDUCATIONAL
DEVELOPMENT
INDEX
(EDI)
2009-10**

Variables used in Computing Educational Development Index (EDI)

| Component | Indicator |
|---|---|
| ACCESS | Percentage of Habitations not Served* (corrected with reference to new schools (Government) opened since 2002-03) |
| | Availability of Schools per 1000 Child Population |
| | Ratio of Primary to Upper Primary Schools/Sections (only at Upper Primary stage) |
| INFRASTRUCTURE | Schools with Student-Classroom Ratio > 40 |
| | Schools with Drinking Water facility |
| | Schools with Common toilet |
| | Schools with Girl's toilet |
| TEACHERS | Percentage of Schools with Female Teachers (in schools with 2 and more teachers) |
| | Schools with Pupil-Teacher Ratio > 40 |
| | Percentage of schools with less than 2 teachers (in schools with more than 15 students) (Primary schools only) |
| | Percentage of Schools with < 3 teachers (Upper Primary schools/sections) |
| | Teachers without Professional Qualification |
| OUTCOMES | Gross Enrolment Ratio - Overall |
| | Participation of Scheduled Castes Children: Percentage SC Population (2001 Census) - Percentage SC Enrolment |
| | Participation of Scheduled Tribes Children : Percentage ST Population (2001 Census) - Percentage ST Enrolment |
| | Gender Parity Index in Enrolment |
| | Repetition Rate |
| | Drop-out Rate* |
| | Ratio of Exit Class over Class I Enrolment (only at Primary stage) |
| | Transition Rate from Primary to Upper Primary level (only for Upper Primary level) |
| Percentage of Appeared Children securing 60 per cent and more marks | |

Note:

- Indicators used for constructing EDI were pre-determined by the MHRD, Government of India. Contributions received from the members of the Multi-Disciplinary Expert and Core Group on EDI constituted by the MHRD in 2005-06 is gratefully acknowledged.
- Indicators were normalized before the Principal Component Analysis was applied to decide the factor loadings and weights.
- Separate dimensional indices were constructed first before finalising the EDI; and
- * Number of access-less habitations has been obtained from the Seventh All India Educational Survey and drop-out rate at Upper Primary level from the Selected Educational Statistics (MHRD). Wherever necessary projected child population provided by the Office of the Registrar General of India has been used.

Assumptions used in Computing EDI

An effort has been made by the National University of Educational Planning and Administration (NUEPA) and the Government of India (MHRD, Department of School Education and Literacy) to compute an Educational Development Index (EDI), separately for Primary and Upper Primary levels of education and also a composite index for the entire Elementary education which is exclusively based on the DISE data for the year 2009-10. The first such attempt was made in 2005-06.

A set of 21 indicators have been used in computing EDI which are re-grouped into the four sub-groups, namely Access, Infrastructure, Teachers and Outcome indicators. The Indicators used for constructing EDI were pre-determined by a Working Group on EDI constituted by the MHRD during 2005-06 of which NUEPA was also one of the institutional members. In the present year, improved versions of a few variables were used. Percentage of access-less habitation was one such variable which is latest available for the year 2002-03. In view of a large number of schools that have been opened across the country in the recent past, the same was corrected with reference to new schools (Government) opened since 2002-03. Like in the previous year, in place of Gross Enrolment Ratio of SC/ST population, percentage of SC/ST population (to total population, 2001 Census) *minus* percentage of SC/ST share of enrolment in Primary and Upper Primary classes has been used to assess participation of the SC/ST children. Like 2008-09, in 2009-10 also, Schools with Student-Classroom Ratio (SCR) above 40 and schools with Pupil-Teacher Ratio (PTR) above 40 have been used in place of schools having SCR and PTR above 60. Similarly, in place of single-teacher schools, percentage of Primary only schools with less than 2 teachers (in schools with more than 15 students) has been used in computing Teacher's Index at Primary level. In view of these changes, average SCR and PTR and percentage of passed children to total enrolment have not been used in computing EDI in 2009-10 both in case of Primary and Upper Primary levels of education.

After data was cleaned, each indicator was *normalised* by using the following formula:

$$NV_{ij} = 1 - \left[\frac{\{\text{Best } X_i - \text{Observed } X_{ij}\}}{\{\text{Best } X_i - \text{Worst } X_i\}} \right]$$

Upon receiving *normalised values*, *Principal Component Analysis* (PCA) was applied to decide the factor loading and weights. In case of a few variables, policy options were explored to identify the *best values* instead of based on the *observed values*. Some of these variables are: access-less habitations (best value, zero), percentage of schools with pupil-teacher and students-classroom ratio above 40 (best value, zero), percentage of teachers without professional qualification (best value, zero) etc. EDI in 2009-10 may not necessarily be comparable with the same in the previous year.

The Honorable Minister has been quite pleased to note the enormous efforts of the NUEPA, the Ministry of HRD and the UNICEF that went into the significant publication, and extends his compliments to all those behind the arduous compilation which would be of immense value to the policy-makers and researchers on the subject.

PS to Minister of HRD
Government of India
November 2010

It must be conceded that the DISE does represent a significant advancement over the earlier systems of data collection, compilation, analysis and publications. In terms of reduction of time-lag and improvement of quality, it represents a phenomenal stride over all the other systems.

DISE can be said to have emerged as a time-tested 'model' to serve educational statistics. It must become the only system and shall be upgraded to cover Secondary and Senior Secondary stages also.

Report of the Review Committee on Educational Statistics
Ministry of Human Resource Development
Government of India
December 2008

One Million+ School Report Cards

(www.schoolreportcards.in)

Winner of Manthan Award South Asia, e-Governance & eINDIA 2010 National Awards

The National University of Educational Planning and Administration has created a comprehensive database on elementary education in India under one of its most prestigious projects, known as, District Information System for Education (DISE). The project covers both Primary and Upper Primary schools/sections of all the districts of the country. What is more remarkable about DISE is that it has completely eliminated the time-lag in availability of educational statistics which has come down drastically from 7-8 years to less than a year at the national and only a few months at the district and state levels. DISE is supported by the Ministry of Human Resource Development and UNICEF.

The National University has successfully developed School Report Cards of more than 1.3 million Primary and Upper Primary schools/sections. In addition to quantitative information, the Report Cards also provide qualitative information and a descriptive report about individual schools. And, all that can now be accessed with the Click of a Mouse. Even school-specific raw data has also been provided online to users.

The Report Cards are produced to provide users comprehensive information on all the vital parameters, be it student, teacher or school related variables, yet concise, accurate information about each school in a standard format which is easy to understand and allows meaningful comparisons to be made among schools. We hope that these reports are used in constructive conversations which lead to improved education for all children across the Country.

DISE: Forthcoming Publications

Elementary Education in India: Where do we stand?, District Report Cards, Volume I, 2009-10

Elementary Education in India: Where do we stand?, District Report Cards, Volume II, 2009-10

Elementary Education in Rural India: Analytical Tables, 2009-10

Elementary Education in Urban India: Analytical Tables, 2009-10

Elementary Education in India: Where do we stand?, State Report Cards, 2009-10

Elementary Education in India: Progress towards UEE, Analytical Report/Analytical Tables 2009-10
